PROFESSIONAL SUMMARY

Aspiring Software Engineer Intern and Full Stack Developer with expertise in C++, Data Structures & Algorithms (250+ problems), and MERN Stack (MongoDB, Express.js, React.js, Node.js). Experienced in building scalable web applications with RESTful APIs, real-time tracking, and geolocation features. Proven ability to optimize backend performance and design efficient systems.

EDUCATION

Budge Budge Institute of Technology, Kolkata **August 2023 – July 2027**

B.Tech in Information Technology ; GPA : 8.30

Relevant Coursework: Data Structures & Algorithms, DBMS, OOP, Software Engineering

TECHNICAL SKILLS

- **Languages:** C++ , C , JavaScript , SQL
- **Core:** Data Structures & Algorithms , STL , Problem Solving
- **Frontend:** HTML , CSS , JavaScript , React.js
- **Backend:** Node.js , Express.js , RESTful APIs
- **Databases:** MySQL , MongoDB
- **Tools:** Git , GitHub , VS Code , Postman
- **Concepts:** API Optimization , Authentication

PROJECTS

SmartSeva – Crowdsourced Civic Issue Reporting & Resolution System

- Engineered a scalable full-stack civic issue reporting platform supporting multiple media formatswith GPS-based issue tracking.
- Designed and developed an admin dashboard to manage and visualize 50+ reports using interactive map integration.
- Implemented role-based access control and authentication workflows to improve system security and workflow efficiency.
- Developed and optimized RESTful APIs capable of handling concurrent client requests efficiently.
- Automated issue tracking and status update workflows, reducing manual monitoring efforts significantly.
- Applied database optimization techniques to improve backend response performance.
- Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MySQL

JanSaarthi – Community Based Disaster Reporting System

- Developed a real-time disaster reporting and monitoring platform with geotagged incident tracking.
- Built 3+ modules for emergency alerts, missing persons tracking, and emergency contact coordination.
- Designed a live monitoring dashboard to improve coordination and incident management.
- Optimized backend APIs and database queries, reducing overall response latency.
- Implemented scalable client-server architecture with responsive UI for mobile and desktop devices.
- Tech Stack: React.js, Node.js, Express.js, MongoDB

Personal Portfolio Website

- Developed a fully responsive portfolio website with dynamic backend integration and API-driven project management.
- Integrated GitHub repositories, contact forms, and real-time project updates.
- Designed responsive UI components optimized for desktop, tablet, and mobile platforms.
- Improved user experience through clean interface design and optimized navigation.

ACHIEVEMENTS

- Solved 250+ Data Structures & Algorithms problems in takeUforward. (TUF↗)
- Solved 100+ Data Structures & Algorithms problems in Leetcode. (Leetcode↗)
- Active GitHub contributor with 50+ commits across multiple repositories.

CERTIFICATIONS

- Data Structures & Algorithms in C++ – PW Skills **January 2026**
